

Spring Number Sense Post-tests 2011

Conclusions

While we are just beginning to implement our new intervention strategies, 82% of our students demonstrated proficiency regarding number sense by the spring of 2011.

Conclusions

Of students who were unable to demonstrate proficiency, 38% demonstrated growth with 29% of those students demonstrating significant growth from the fall to the spring.

Reasons for Student Success!

- ✧ Daily math reviews were graded the same morning that they were taken
- ✧ Students received immediate feedback
- ✧ Students who still had errors attended that day's tutoring session to examine errors and make corrections
