

Co-Creating The Curriculum Framework to Activate Future-Ready Learning

Overall Description for This Focus Area: *Ensure that this description provides a clear overview of the focus area and incorporates the included components.*

Questions, Guidelines , and Examples					
Components with Descriptions	Templates and Sample Lesson Plans	Related Instructional Strategies	Possible Assessments	Additional Related Resources	Examples (e.g., Videos, Case Studies)
<i>What are the components for this focus area that will guide unit development and classroom learning experiences?</i>	<i>Which templates and/or lesson plans can serve as PK-12 tools for this component?</i>	<i>Which instructional strategies are best aligned with this component?</i>	<i>Which assessments can be used for this component as evidence of implementation and learning impact?</i>	<i>Which additional resources provide greater insight about this component?</i>	<i>Which videos and/or case studies demonstrate this focus area in classrooms?</i>
<i>Include a description that is detailed enough to clearly communicate the component.</i>	<i>Link 3 to 5 blank templates and/or lesson plans. Add a description to the link. Include templates that address elementary, middle, and high school needs.</i>	<i>Include 3 to 5 instructional strategies that are strong for your focus area. Incorporate strategies that are successful with elementary, middle school, and high school students. Provide a description with each strategy and add a link to information that gives greater detail about how to implement each strategy.</i>	<i>Provide 3 to 5 assessment ideas or actual assessments if appropriate for the component. Include ideas and/or assessments that can be used with elementary, middle school, and high school students.</i>	<i>Offer 3 to 5 additional resources in this section. Create a link for each resource and provide a brief explanation.</i>	<i>It is likely that the videos you include will incorporate many of the components in your focus area. Include videos that show a range of ages from elementary to high school. It will be helpful to include a brief introduction to the video.</i>
Community Collaboration: By fostering community partnerships, educators extend the learning space beyond the classroom walls. These partnerships allow students the opportunity to problem-solve real-world issues by engaging in research in real time with real people.	(K-12) <u>Student Inquiry Organizer Template:</u> This template is useful when helping students to figure out what their question is and what they already know about a specific topic.	(K-12) <u>Engaging Students:</u> This 2-page document provides approximately a dozen different protocols that can be utilized to help guide activities employed in PBL.	(K-12) <u>General Assessment Strategies and Tools:</u> These sample strategies and assessment tools are generic and can be tailored for grade level and content.	(K-12) <u>Resources for Building Community Partnerships:</u> Learn how schools can benefit from the support and expertise of local businesses, organizations, and individuals, and discover strategies for fostering successful business and community partnerships.	(K-8)Video: <u>Two-Rivers' Problem-Based Learning Approach:</u> This video showcases students collaborating with one another as they engage with real world issues.
